

Going...Going...Green!

Budget Paper Supplies has been a premier manufacturer and supplier of paper and board products for over 20 years.

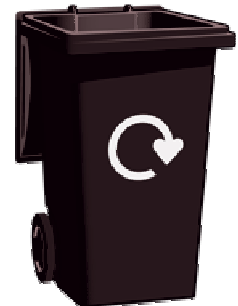

BPS has been a member of Business Investors for several years, and have already made great strides in improving their environmental performance, including reusing and recycling their waste paper. However, this still left them with a skip with a significant amount of general waste.

After accessing further Business Investor support in 2007, Richard has:

“The CIWM course consolidated and added to my existing knowledge, and gave me the impetus to initiate some ideas that I have been considering for a while.”

Richard Aldiss, Budget Paper Supplies

- Identified an avenue for recycling polythene wrapping, which took up around 80% of their waste skip, reducing their waste to landfill by around 3 tonnes per year
- Ensured BPS complies with environmental legislation, and in particular the Duty of Care
- Reduced electricity and water consumption, through fitting energy-efficient lights and light fittings and water-displacement devices
- Looked into further initiatives to reduce waste, which may come on-line in the future
