

Cutting bills by 84%

Westland Horticulture is one of the UK's leading manufacturers of home gardening products. The company is committed to minimising the impact of its activities on the natural environment and access to Business Investor support has proved highly successful.

Located in a large warehouse in Huntingdon, key priorities for the organisation include packaging use, waste emissions and disposal, energy consumption & transportation of goods.

Achievements:

- A 82% reduction in gas consumption (a realised saving of 84% on previous years bills)
- Awareness raising campaign highlighting staff environmental risks
- Provision of warm PPE for factory staff,
- Increased productivity & significant decrease in waste to landfill
- Establishment of Westland's '*green team*' comprising members of staff from all aspects of the business who together are proactively involved in managing, monitoring, and promoting sustainability throughout the organisation.

'Business Investors has helped our business to better incorporate sustainability in a practical, cost-effective manner.'

'The interactive onsite support days and training have acted as a fantastic basis in our progression towards ISO14001.'

Clive Sutton, Technical Manager, Westland Horticulture.
