‘Streamlining’ Sustainability...

Located in Wisbech, Stream Foods Ltd was set up in 2000 with the aim of making fruit more fun to eat. The company has since grown in size, and currently produces Fruit Flakes, School Bars and a variety of other nutritious fruit snack products for stores including Sainsburys .

Key environmental impacts associated with the business include waste disposal, energy consumption, water consumption, packaging materials and the transport of raw materials and goods.

Business Envestors offered Roberta Reeve (Technical Manager and newly appointed Environmental Manager, Stream Foods) the opportunity to increase her knowledge and awareness of environmental issues, and to use this knowledge to promote sustainability as a core business strategy to their board.

Achievements:

- Increased awareness onsite
- Senior Management Support
- 20% reduction in energy consumption per kg of production
- 40% reduction in oil consumption (heating) per kg production
- 60% reduction in water consumption per kg of production
- 20% reduction in waste to landfill per tonne of production
- 12% reduction in liquid waste per tonne of production
- 60% increase in cardboard recycling per tonne of production

“Through Business Envestors, we have significantly increased our employees awareness of environmental issues.

We have also improved our businesses efficiency and sustainability which is great for staff morale and company growth”.

Roberta Reeve, Technical Manager, Stream Foods
